DATE MAILED: 12/20/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/631,111	Applicant(s) CHEN ET AL	
	Examiner Kimberly T. Wood	Art Unit 3632	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11/7/05.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 4-7 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 4-7 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 3632

This is an office action for serial number 10/631,111, Vibration Motor Boot, in response to amendment filed on November 7, 2003.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Odagiri et al. (Odagiri) 5,801,466. Odagiri discloses a frame (12), a mounting slot (where boot "2" is received), a motor installation surface (inside surface of mounting slot or top surface of frame), a flexible boot (2), motor-receiving slot (where vibrator "3" is received within boot "2"), a rib (84 or 85), exposed surface (outer surface of the boot "2"). Odagiri teaches that the boot is flexible since is made of a very thin metal which can be bent a little to allow for motor to be received within the motor-receiving slot.

Art Unit: 3632

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Odagiri 5,801,466, as discussed above. Odagiri discloses the claimed invention except for flexible material for the boot. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made the boot of a flexible material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Response to Arguments

Applicant's arguments filed November 7, 2005 have been fully considered but they are not persuasive.

Art Unit: 3632

In response to the applicant's arguments that the vibration holder/boot (2) is not detachable from said mounting slot the examiner would like to point out that since, the holder/boot (2) is attached within the mounting slot by screws that the screws can be removed therefore making the holder/boot (2) detachable from the mounting slot.

In response to the applicant's arguments that the vibration holder/boot (2) is not flexible the examiner hereby traverses this argument. The holder/boot (2) is made of very thin metal or material which can definitely be bent or flexed to allow the motor to be received within the motor receiving slot of the holder/boot (2). The holder/boot is flexible due to the material being able to yield to the influence of a tool or a user to adapt to a new, different, or changing requirement (Merriam Webster's Collegiate Dictionary tenth edition), therefore meeting the requirements of the claimed invention.

In response to the applicant's arguments that Odagiri does not include "said motor-receiving slot having an axis angled from an axis of said mounting slot and generally normal with respect to said motor installation surface this argument is hereby traversed. Odagiri clearly teaches that the motor-receiving slot (where vibrator "3" is received within boot "2") has an axis angled from an axis of said mounting slot (where

Art Unit: 3632

boot "2" is received) and generally normal with respect to said motor installation surface (inside surface of mounting slot or top surface of frame 12).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly T. Wood whose telephone number is 571-272-6826. The examiner can normally be reached on Monday-Thursday 7:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leslie Braun can be reached on 571-272-6815. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

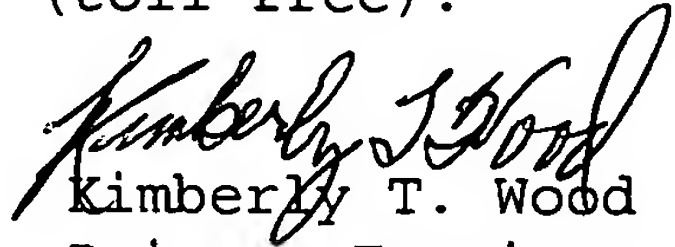

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
